

Broadbent Laundry Systems Vega Open House Event 2011

laundry systems division

Vega Celebrate 10 Years!

Vega recently held an Open House event at their 10,800 sq mtr factory in OSS, Netherlands. Vega exhibited their full range of equipment including a brand new range of large piece feeders for sheets, duvets and table linen. Vega also had their new Transfeed and Robofeed ultra-high speed sheet feeding solution on demonstration.

New Developments

Vega have continued to grow during the recession and are actively developing new products. Their range of towel folders has expanded with options for cross-folders, belt-reverse folders, knife French folder and combination air-knife French folders. The APM, APM/L and AMP Roll-Off make up a complete range of high quality, large and small-piece, belt-reverse folding. Anyone who might be considering finishing equipment or complete ironing lines, including efficient gas ironers, should contact Broadbent about the Vega range of products.
